**Home:** House No. B-230,Block-10 ,Gulshan-e-Iqbal, 75300 Karachi (Pakistan)

## ABOUT ME

.NET Developer with 7+ years of experience in the full software development lifecycle, excelling in ASP.NET Core, Blazor Server/WebAssembly, and responsive design. Known for innovative problem-solving within Agile frameworks, effectively collaborating with teams to deliver robust web applications. Proficient in MVC frameworks and dependency injection, consistently driving forward-thinking solutions and seamless user experiences.

## WORK EXPERIENCE

### Senior .Net software developer

**Sator-IT Pvt. Limited** [ 01/03/2017 – Current ]

**City:** Karachi | **Country:** Pakistan

- Participated in all phases of software development, from requirements gathering to final product delivery.
- Collaborated daily with team members to share progress and address challenges.
- Provided regular updates on user stories during weekly Agile ceremonies.
- Executed routing logic using ASP.NET MVC to direct user requests to appropriate controllers and actions.
- Generated reusable UI components using MVC Razor view engine.
- Leveraged ASP.NET MVC dependency injection to improve code organization and maintainability.
- Developed responsive web applications using HTML5 and Bootstrap.
- Built web applications using Blazorise components.
- Transformed business and user requirements into functional software applications.
- Integrated software components across various systems and platforms.
- Developed applications using ASP.NET Core versions 3.1, 5.0, and 6.0.
- Built microservices using ASP.NET Core Web APIs and Orleans.
- Created both server-side and client-side Blazor applications.
- Utilized SQL Server for data storage and retrieval.
- Optimized database queries for improved performance.
- Designed and implemented complex database schemas.
- Developed and maintained stored procedures and triggers.
- Employed SourceTree for version control management.
- Developed RESTful APIs for data exchange.
- Increased code reusability through the creation of NuGet packages.
- Developed custom JavaScript libraries for reusable functionalities.
- Enforced complex UI interactions using jQuery.
- Optimized JavaScript code for performance improvements.
- Established interactive data visualizations with JavaScript and jQuery.
- Using MSSQL Server Management Studio to create and manage databases, execute queries, and perform administrative tasks.
- Utilizing Jira to track project progress, assign tasks, and manage workflows.
- Collaborating with team members using Jira's issue tracking and discussion features.
